

Machine Appliqué

Class Supply List

Instructor: Annie Unrein
www.byannie.com
annieu@infowest.com

In the class you will learn two methods of machine appliqué:

- mock needle-turn appliqué
- fusible thread appliqué

Rather than make a big project, we will just focus on learning the technique as we make a small sample using each method. Once you understand the technique, you'll be able to apply what you've learned to any appliqué project.

We'll make the Flower Block pictured below using the mock needle turn method. The class price includes a kit with all the supplies needed to make the block along with bobbins wound with the necessary threads. If you choose, you can use the block in a quilt or finish it to be a small wall hanging or pillow front.

For the fusible appliqué portion of the class, we will make a small Needle Case. Again, the class price includes all the supplies needed to make the block along with a bobbin wound with the fusible thread.

BRING TO CLASS:

- Sewing machine with 1/4" foot and open-toe embroidery foot
- Black thread for assembling the Needle Case and various colors of threads for finishing the raw edges on the fused shapes

Flower Block

You'll love learning the mock needle-turn technique — it's so much faster than hand appliqué, yet gives the look of needle-turn appliqué.

Needle Case

Appliqué done using fusible thread allows you to layer several fabrics yet keep everything soft — no stiffness!

The needle case has two pockets for holding packs of needles and a flannel piece for holding pins and needles.
