Class Description

Learn the secrets to making bags that look like you bought them -- not like you made them!

Annie will share techniques for working with Soft and Stable, vinyl laminate, chalkboard fabric, mesh, and vinyl as well as how to make sturdy handles and add hardware.

Inspired by the classic brown bag, this roomy carrier has plenty of room for a thermos, bottle of water, sandwich, fruit, and more.

The bag's flat bottom supports an upright structure and a padded handle on top makes it easy to carry. The fold-over flap closure opens wide for easy access to the bag's contents yet fastens securely for convenient transport.

An interior mesh pocket holds an ice pack, napkins, or silverware. A border of chalkboard fabric on the front can be used to identify the owner or offer a few words of encouragement for the day. If you prefer, substitute a coordinating fabric for the border. An ID window on the back eliminates mix-ups in the lunch room or cafeteria.

ByAnnie's Soft and Stable gives great stability, provides insulation for the contents, and ensures that the bag will look great even after repeated use and laundering.
